OUTSIDE CORNER INSTALLATION

#1 – Exposed outside corner section ready for retrofit. Note enclosure's back panel is installed to the face of the wooden base molding.

#2 – The inside corner component is attached to the intersecting wall.

#3 – One of the short panels is now attached from the inside corner.

#4 – Both short panels are now attached and the open left and right ends are attached (look carefully at the floor).

#5 – The recessed height outside corner is now attached to the open left and right end caps.

#6 – A finished outside corner installation.
