PACKAGING AND SHIPPING

#1 – Staging area: Prints and samples are on display to identify the correct accessory components for packing each order.

#2 – The components for each order are organized on moveable shelving racks. Each panel has a stamp for identification.

#3 – The panels are wrapped with foam and taped. Cardboard sleeves are attached to the leg extensions of each panel.

#4 – This is the bottom layer of a two-panel box with the bubble wrapped accessory components positioned inside the panel cavity.

#5 – This is a finished two-panel box ready to be sealed. Panels are positioned back-to-back and secured with cardboard sleeves.

#6 – A customer order ready to go to the shipping department and be entered into UPS Worldship software.
