REMOVING EXISTING BACK PANELS & SUPPORT BRACKETS FOR SPECIAL INSTALLATIONS SUCH AS WAINSCOTING

#1 – Remove all existing snap on or slide on components to prepare enclosure for removal.

#2 – Use hammer to loosen support brackets and slide them horizontally to the closest opening (they will be re-used).

#3 – Slide all existing support brackets out from existing back panel.

#4 – Remove existing nails or screws that anchor the back panel to the wall.

#5 – Once back panel has been detached from wall, slide it up and out.

#6 – This photo shows the modified support brackets re-installed. See *Re-Using Existing Support Brackets* page for detail.
